

# allergy amulet

Introducing the **AMULET**:  
the world's smallest & fastest  
food allergen sensor.

## THE SCIENCE

We're taking tests that have historically been performed in labs, and putting them into consumer hands. Our proprietary and patented sensors are made up of thin films containing trillions of molecular nanocavities that match and bind to target allergenic molecules. When in contact with the allergenic ingredient, our sensor generates a unique electric signal, which alerts the user of the allergen's presence. For more about how our science works, visit [allergyamulet.com/technology](https://allergyamulet.com/technology)

**Allergy Amulet online  
shop opening in 2024!**

Visit [ALLERGYAMULET.COM](https://ALLERGYAMULET.COM) to sign up for our newsletter, so you'll be the first to know when the shop opens.

## HOW IT WORKS

Collect a sample of food, and within seconds, the Amulet reports if the target food allergen is present.

Store it in a backpack, carry it on your keychain, or wear it around your neck! The sleek and portable design allows users to savor life's important moments, safely and simply.

**01.**  
Insert food into sampler, push cap down, and twist to close.

**02.**  
Connect sampler to the Amulet to run a test.

**03.**  
*Optional:* pair the Amulet with our app.

**04.**  
Get results in ~1 minute!
